

AHMED OSMAN

Software Engineer

✉ ahmed.osman@tuta.io | ☎ +201208731604 | GitHub: [AhmedOsmanDev](#) | LinkedIn: [AhmedOsmanDev](#) | Egypt

PROFESSIONAL SUMMARY

Software Engineer with **3+ years** of hands-on experience building scalable, high-quality applications. Strengths lie in object-oriented, data structures, algorithms, and applying design patterns to solve real-world problems efficiently. Known for being detail-oriented and reliable, delivering clean, maintainable code on time. Fast learner and a proactive team player who thrives in collaborative environments. Currently focused on expanding expertise in **cloud computing**, **DevOps**, and **AI**.

TECHNICAL SKILLS

Languages: C#, Python, SQL, HTML, CSS, JavaScript, C, C++, Bash

Frameworks & Libraries: .NET, *Angular*, REST API, MVC, SignalR, Entity Framework, Dapper, ADO.NET

Databases & Caching: SQL Server, MongoDB, NoSQL, Redis, RabbitMQ

Architecture & Practices: OOP, Data Structures, Algorithms, Problem Solving, Database Systems, SOLID Principles, Design Patterns, Microservices, Clean Code, Unit Testing, Authentication

DevOps & Tools: Docker, Linux, Microsoft Azure, Git

PROFESSIONAL EXPERIENCE

Software Engineer | [Intalio](#)

May 2025 – Present • Cairo, Egypt

HVS – High Volume Scanning

- Refactored code for maintainability and modular services.
- Automated PDF report generation for user performance.
- Improved workflow with status updates, comments, and user activity logging.

Junior Backend Developer | [IPMagiX](#)

Oct 2024 – Apr 2025 • Remote

eZagel – WhatsApp Service

- Two-way communication between sender and recipient.
- Sending text, image, audio, video, and marketing template messages.

eZagel – SMS Service

- Identified and resolved security vulnerabilities in collaboration with the penetration testing team.
- Proactive secure code development to protect against DoS attacks.

Accor – Hospitality Service

- Contributed to backend features for the hospitality platform.

Back-End Engineer | [Axapta IT](#)

Dec 2023 – Mar 2025 • Remote

UnifiedTalk

- Elevated system performance by 40% through local memory, Redis, and SQLite caching strategies.
- Incorporated SignalR for real-time chat and notifications, boosting user engagement with timely updates and alerts.
- Integrated PayPal gateway for secure payment processing.

- Successfully implemented a consumer-producer approach using RabbitMQ, enhancing system efficiency and scalability.

Baseeta

- Created Azure Storage account and initiated 10+ containers.
- Increased API security by using Shared Access Signature setting expiration durations for Blobs, reducing unauthorized access by 40%.
- Decreased development costs by 70% using Docker to deploy SQL Server, Redis, Seq, .NET, and Python on a single Linux machine.

Masareefi

- Localized messages and names in 3 languages to enhance user experience and accessibility.
- Built a search engine with Python and Hugging Face, using Qdrant and Redis vector databases.

Axapta IT Website

- Developed and maintained the company's official website, contributing to its online presence and brand representation.

Software Engineer | Freelance

Jul 2022 – Present • Cairo, Egypt

- Fathy.Swagger – NuGet package for adding Swagger to .NET Web APIs.
- Upwork Freelance Project – API bug fixes and Azure deployment.
- ElmourchidiTube – Firebase function fetching YouTube subscriptions and pushing to Telegram bot.
- Mustafa Kamel Portfolio – eCommerce Web App for UX designer.
- Printing System – Windows application for a printing company.

EDUCATION

Bachelor of Computers and Information | Assiut University

Sep 2018 – Jun 2022 • Assiut, Egypt

Learning Lantern – Graduation Project

- University learning portal with integrated cloud services and content-creation tools for online education.

CERTIFICATIONS & ACHIEVEMENTS

- 4th Place – 2019 Assiut Collegiate Programming Contest
- Docker Course from Basics to Advanced
- Mastering Vector Databases for AI Applications
- Succeeding in Web Development: Full Stack and Front End
- Redis | RU101: Introduction to Redis Data Structures
- Database Fundamentals
- Cloud Computing Basics (Cloud 101)
- Google IT Support Specialization
- IT Security: Defense against the digital dark arts
- System Administration and IT Infrastructure Services
- Operating Systems: Becoming a Power User
- The Bits and Bytes of Computer Networking
- Technical Support Fundamentals

VOLUNTEERING

Instructor & Mentor | ICPC Assiut University Community

Oct 2018 – Jun 2022 • Assiut, Egypt
